

FALL NOXIOUS WEED ACTION BULLITEN

Restoring healthy pastures, fields and yards affected by the flood includes many strategies. Fall is a splendid time to initiate competitive seeding with a fall cover crop.

The Big T Conservation District is offering a Fall Cover Crop Seed mix (at \$1.50/ pound, 10 pound minimum) and the use of a broadcast seeder. We will deliver this to you and a tech will be available for questions about continued weed management on your particular site. The fall mix contains: winter peas, hairy vetch, radishes, turnips, canola and winter rye.

Mowing existing weeds before seeding is encouraged. ***But don't wait for ideal conditions- the weeds have already dropped their seeds so give them some competition!***
