

## Thousand Canker Disease

Thousand Canker Disease, TCD is a disease of black walnut, *Juglans nigra*. See information at: [http://www.ext.colostate.edu/pubs/insect/0812\\_alert.pdf](http://www.ext.colostate.edu/pubs/insect/0812_alert.pdf).

Thousand canker disease has been identified in Larimer County, at the present time sanitation is the key to not allowing this disease to spread. If you believe that your tree has TCD please contact this office at 498-5765 or the Fort Collins Forestry Office at 221-6302 if you live within the Fort Collins city limits. Trees with TCD will need to be removed, chipped and taken to the County Landfill.

**Do not bring walnut wood into Larimer County that still has bark on it.**
